Fantech Item Bulletin

March 14, 2022

To our Valued Partners,

In 2022, we will transition from the EDF1, EDF1R Multi-function Controllers to the new enhanced EDF3 Electronic Multi-function Controller. This product will deliver additional benefits to you and your customers.

1. Transition from EDF1, EDF1R Multi-function Controls to EDF3 Electronic Multi-function Controller

The EDF3 Electronic Multi-function Push Button Controller manages the home's ventilation system with a single 'push' of the button. This new product gives the homeowner added control over their ventilation system with the new manual settings. Manufactured with the customer in mind, this controller works with all Fantech Fresh Air Appliance (FAA) models.

This announcement contains information about the most important highlights of the EDF3 Electronic Multi-function Controller, for your reference.

Improvement	Benefit
New 'ECONO' Mode	Allows the homeowner to run their FAA continuously at low or medium speeds
Updated '20 min/h' Mode	Updated '20min/h' feature to run the FAA in intermittent mode with either the '20 min' or the '40 min' function or in recirculation mode (if applicable)
New 'CONT' Mode	Feature that activates the FAA to run at high speed in ventilation or recirculation mode continuously
New 'OFF' Mode	Improved modulation in case of extreme weather or natural disasters

The following cross-reference chart highlights the differences between the EDF3 and previous EDF products.

New Product			Outgoing Product		
Item Nr	Name	Description	Item Nr	Name	Description
415515	EDF3	Electronic Multi-function Push Button Controller	40375	EDF1	Multi-function Controller
			40393	EDF1R	Multi-function Controller w/ Recirculation

Please do not hesitate to call your sales representative or Fantech's customer service desk for details if necessary.
